

Kanohar Electricals IPO Allotment Status, GMP, Subscription, Listing Date, Price Band & Review

[Kanohar Electricals IPO](#) was one of the notable Mainboard IPOs in the Indian stock market. Kanohar Electricals Limited is engaged in the manufacturing of transformers and electrical equipment used across power transmission, power distribution, railways, renewable energy and other infrastructure sectors.

The company came to the primary market with an IPO size of ₹1,055.74 crore. The issue included a fresh issue as well as an Offer for Sale (OFS). Investors closely tracked the **Kanohar Electricals IPO Allotment Status**, **Kanohar Electricals IPO GMP**, subscription figures, [Kanohar Electricals IPO Listing Date](#), price band and overall IPO performance.

Kanohar Electricals IPO Overview

Kanohar Electricals IPO had a price band of ₹601 to ₹632 per equity share. The lot size was 23 shares, which meant that retail investors had to invest a minimum of ₹14,536 at the upper price band.

The IPO opened for subscription on September 8, 2026, and closed on September 10, 2026. The basis of allotment was scheduled for September 11, 2026, while the shares were scheduled to be listed on BSE and NSE on September 16, 2026.

The IPO attracted significant investor attention because of the company's presence in the transformer and electrical infrastructure industry.

Kanohar Electricals IPO Important Details

Kanohar Electricals IPO Price Band: ₹601 – ₹632 per Share

Lot Size: 23 Shares

Minimum Investment: ₹14,536

IPO Opening Date: September 8, 2026

IPO Closing Date: September 10, 2026

Allotment Date: September 11, 2026

Kanohar Electricals IPO Listing Date: September 16, 2026

Listing Exchange: BSE & NSE

Registrar: MUFG Intime India Private Limited

Kanohar Electricals IPO Allotment Status

The **Kanohar Electricals IPO Allotment Status** is an important update for investors who applied for the IPO. The basis of allotment was finalised after the IPO bidding period ended.

Investors can check their allotment status through the registrar's website or through the official websites of BSE and NSE, depending on the available facility.

The allotment status generally shows whether the investor has been allotted shares, the number of shares allotted and the amount that will be refunded in case of non-allotment or partial allotment.

How to Check Kanohar Electricals IPO Allotment Status

Investors can check the **Kanohar Electricals IPO Allotment Status** by following these general steps:

1. Visit the official website of the IPO registrar.
2. Select Kanohar Electricals IPO from the available IPO list.
3. Enter PAN details, application number or other required information.
4. Submit the details.

5. Check the allotment status displayed on the screen.

Investors should ensure that the details entered match the information used while applying for the IPO.

Kanohar Electricals IPO GMP

The **Kanohar Electricals IPO GMP** was closely monitored by investors before the listing. GMP stands for Grey Market Premium and represents the premium at which IPO shares may potentially trade in the unofficial grey market before listing.

The latest reported GMP was around ₹232, which indicated an estimated premium of approximately 36.7% over the upper IPO price band of ₹632. Based on this GMP, the indicative listing price could be around ₹864.

However, the **Kanohar Electricals IPO GMP** should not be treated as a guaranteed listing price. Grey market transactions are unofficial and GMP can change quickly depending on market conditions, investor sentiment and demand.

Investors should therefore use GMP only as one of several indicators while evaluating the IPO.

Kanohar Electricals IPO Subscription Status

The **Kanohar Electricals IPO Subscription Status** showed strong demand from investors during the bidding period.

The IPO received an overall subscription of approximately **90.59 times** by the end of the issue period. The Qualified Institutional Buyers (QIB) portion was subscribed around **215.37 times**, while the Non-Institutional Investors (NII) category received approximately **87.74 times** subscription.

The Retail Individual Investors (RII) portion was subscribed around **20.51 times**.

Kanohar Electricals IPO Subscription Details

Investor Category	Subscription
-------------------	--------------

QIB	215.37x
-----	---------

NII	87.74x
-----	--------

Retail	20.51x
--------	--------

Overall	90.59x
---------	--------

The strong **Kanohar Electricals IPO Subscription Status** reflects significant investor interest in the issue. However, high subscription does not automatically guarantee listing gains or strong long-term stock performance.

Kanohar Electricals IPO Listing Date

The **Kanohar Electricals IPO Listing Date** was scheduled for **September 16, 2026**. The equity shares were scheduled to be listed on both the **BSE and NSE**.

Investors who received shares through the allotment process could see their holdings credited to their demat accounts before the listing.

The actual listing price may be different from the IPO price and any grey market estimate because the opening price depends on real-time buying and selling demand in the stock market.

Therefore, investors should not assume that the GMP-based estimated price will necessarily become the actual listing price.

Kanohar Electricals IPO Price Band

The **Kanohar Electricals IPO Price Band** was fixed at **₹601 to ₹632 per equity share**.

The face value of each equity share was ₹2. The [IPO lot size](#) was 23 shares, meaning investors applying for one lot at the upper price band needed ₹14,536.

Investment Calculation

Upper Price Band: ₹632

Lot Size: 23 Shares

Minimum Investment: ₹632 × 23 = **₹14,536**

The **Kanohar Electricals IPO Price Band** was an important consideration for retail investors because the lot size determined the minimum capital required for an application.

The final issue price was determined through the [book-building process](#) based on investor demand during the IPO.

About Kanohar Electricals Limited

Kanohar Electricals Limited was established in 1972 and operates in the electrical equipment and transformer manufacturing industry.

The company manufactures transformers and related products that are used in power transmission and distribution applications. Its business also serves sectors such as railways and renewable energy.

India's increasing focus on electricity infrastructure, renewable energy and transmission and distribution networks could provide long-term growth opportunities for companies operating in the transformer and electrical equipment industry.

The company has developed manufacturing and testing capabilities for different types of transformers and electrical equipment. Its long operating history is also one of the factors investors may consider while evaluating the business.

Kanohar Electricals IPO Issue Size

The total issue size of Kanohar Electricals IPO was ₹1,055.74 crore. The issue consisted of a ₹300 crore fresh issue and an Offer for Sale of approximately ₹755.74 crore.

The proceeds from the fresh issue were intended to be used for the company's business requirements, including expansion, working capital and general corporate purposes.

In an Offer for Sale, the proceeds generally go to the existing selling shareholders rather than directly to the company.

Therefore, investors should consider the fresh issue and OFS portions separately when analysing the IPO.

Kanohar Electricals IPO Strengths

Kanohar Electricals has several factors that may support its long-term business prospects.

One of the major positives is its presence in the transformer manufacturing industry. Transformers are essential components of power transmission and distribution systems, and demand can increase as electricity infrastructure expands.

The company also serves multiple sectors, including power transmission, power distribution, railways and renewable energy. This diversification across infrastructure-related sectors may provide opportunities for future growth.

Another important factor is the company's long operating history. Established in 1972, Kanohar Electricals has several decades of experience in the electrical equipment industry.

The ₹300 crore fresh issue can also provide additional capital for business expansion, working capital requirements and other corporate purposes.

Kanohar Electricals IPO Risk Factors

Despite the growth opportunities, investors should also consider the risks associated with the company.

The company's business is closely connected with the power and infrastructure sectors. Any slowdown in infrastructure investment, project execution or government spending could affect business performance.

Customer concentration and dependence on government-related projects can also create business risks. Changes in government policies, project timelines or procurement processes may affect revenue visibility.

Another factor to consider is the large OFS component of the IPO. Since a significant portion of the issue consisted of an Offer for Sale, a substantial amount of the IPO proceeds would go to existing shareholders rather than directly to the company.

Investors should therefore evaluate the company's financial performance, debt levels, profitability, valuation and future growth prospects before making an investment decision.

Kanohar Electricals IPO Valuation

The IPO valuation should be evaluated in relation to the company's earnings, financial performance and comparable companies in the electrical and transformer manufacturing industry.

India's growing electricity demand, renewable energy expansion and investment in transmission and distribution infrastructure can create long-term opportunities for transformer manufacturers.

However, strong industry growth does not automatically mean that an IPO is attractively valued.

Investors should compare the company's valuation with its earnings, margins, growth rate, debt position and industry peers before making an investment decision.

Kanohar Electricals IPO Review

Our **Kanohar Electricals IPO Review** suggests that the company operates in an industry with significant long-term infrastructure relevance.

The company's presence in transformer manufacturing, power transmission, power distribution, railways and renewable energy provides exposure to multiple infrastructure-related growth areas.

The company's establishment in 1972 and its long operating history can also be considered positive factors.

At the same time, investors need to consider risks related to valuation, infrastructure spending, customer concentration, project execution and the large OFS component.

The strong subscription of 90.59 times and positive GMP indicated strong market interest around the IPO. However, these factors alone should not be considered sufficient for making an investment decision.

Should You Invest in Kanohar Electricals IPO?

Based on this **Kanohar Electricals IPO Review**, the company may attract investors who are looking for exposure to India's electrical infrastructure and transformer manufacturing sector.

However, investors should not make their decision based only on GMP, subscription numbers or expected listing gains.

For long-term investors, factors such as revenue growth, profitability, order book, operating margins, debt, valuation, customer concentration and expansion plans are more important.

Investors with a higher risk appetite may consider the company's growth prospects, while conservative investors should carefully assess the valuation and business risks before investing.

Kanohar Electricals IPO Expected Listing Performance

The **Kanohar Electricals IPO GMP** suggested a potential premium over the upper IPO price band before listing. Based on the reported GMP of around ₹232, the indicative price was approximately ₹864 against the upper IPO price of ₹632.

This represents an indicative premium of around 36.7%.

However, investors should remember that GMP is unofficial and does not guarantee the actual listing price. The final listing price will be determined by market demand and supply on the **Kanohar Electricals IPO Listing Date**.

Kanohar Electricals IPO Conclusion

Kanohar Electricals IPO was an important Mainboard IPO from the transformer and electrical infrastructure sector. With an issue size of ₹1,055.74 crore, a **Kanohar Electricals IPO Price Band** of ₹601 to ₹632 and a lot size of 23 shares, the IPO attracted strong attention from investors.

The company's long operating history, transformer manufacturing capabilities and presence across power transmission, power distribution, railways and renewable energy are among its key strengths.

The **Kanohar Electricals IPO Subscription Status** also reflected strong investor demand, with the issue subscribed approximately 90.59 times overall.

The **Kanohar Electricals IPO GMP** indicated positive grey market sentiment, while investors also closely followed the **Kanohar Electricals IPO Allotment Status** and **Kanohar Electricals IPO Listing Date**.

At the same time, investors should consider risks related to government and infrastructure spending, customer concentration, valuation, project execution and the large OFS component.

Overall, Kanohar Electricals can be an interesting company for investors looking at the long-term growth of India's power and electrical infrastructure sector. However, investors should conduct their own due diligence and carefully review the company's financials and official IPO documents before making any investment decision.
